**BID BULLETIN NO. 3**

5 August 2020

Supply, Delivery, Installation, Supervision, Training, Testing and Commissioning of One (1) Set of Licensed Professional RF Network Planning Software for the People's Television Network, Inc. (PTNI)  
**ITB NO. 2020-0016**

In response to queries, this Addendum is issued to modify or amend the bidding documents. This shall form an integral part of the bidding documents.

QUERIES	RESPONSE
With regards on the perpetual license, is the updates of the provided software forever or just for the two year warranty period?	The perpetual license means that the software is a one-time purchase and not based on subscription. The software should still work even if the warranty has already lapsed. Updates, upgrades, and support shall be free of charge within the specified warranty period. The vendor shall provide extended warranty provisions for updates, upgrades, and support.
Regarding on item no. 4 Cartographic Database 5m 2D data in Metro Manila, it is also written that you need a Rasterized Population Data.  Do you need a Rasterized Population Data only for 20m resolution Nationwide? Because in the main description of the software you only give a description of a 20m data but here in the table you also write about 5m data  So do you need the population data for this small airing in Manila or population for the whole territory of the Philippines?	The 5m Data for Metro Manila should be applied for the <b>geographical data</b> . (not for the population data).
In the main description of software the vintage in 20m data is 2017-2018 there is no vintage requirement for 5m data. What is the vintage of 5m data you would like to purchase?	Vintage should be 2020 (latest).

<p>The vintage of the data should've confirmed by the certificate of the geographical data supply, how will you check the vintage of the data?</p>	<p>The Supplier must provide a certificate from a geographical data supplier. It will be submitted prior to acceptance of the project.</p>
<p><b>Under 5.2.4.9 Other functions</b> (vii) Depression angle map, what do you mean by this?</p>	<p>5.2.4.9 are just other functions and item (vii) Depression angle map is basically the angle of depression from transmitting station to a specific target position with the desired receiving antenna height (i.e. 1.5m or 10m).</p>
<p><b>5m data</b> – Do we have to also deliver population data for Metro Manila or only geographical data?</p>	<p>Only geographical data for Metro Manila,</p>
<p><b>There is nothing mentioned regarding the vintage of 5m data for Metro Manila.</b> What is the vintage of 5m data?</p>	<p>Vintage should be 2020.</p>
<p><b>How will the vintage of data be confirmed?</b> Do we need to supply any certificate from the geographical data supplier?</p>	<p>The Vendor must provide a certificate from a geographical data supplier.</p>
<p>Could you please clarify the perpetual license?</p>	<p>The perpetual license means that the software is a one-time purchase and not based on subscription. Updates and support shall be free of charge within the specified warranty period and that the software will still work even if the warranty already lapsed.</p>
<p>Do we need to deliver 2 monitors for each set of computers (4 totally) or is it a misprint in the documentation?</p>	<p>Only one monitor per computer set, a total of 2 monitors.</p>
<p>5.2.1.1 Digital broadcasting planning tool must be able to load the following cartographic data layers in a single project: viii. Indoor plans for Indoor propagation calculation - what do you mean by this?</p>	<p>The software should be able to make portable indoor coverage calculations. The user should have a possibility to set building penetration loss (BPL) value which can be adjusted to specified as well as clutter dependent. The user should have a possibility to change the clutter dependent values of the BPL according to the measurement being made. The actual indoor plans are not required like the one used in Telco.</p>
