TECHNICAL SPECIFICATIONS AND REQUIREMENTS

PROJECT TITLE: Supply, Delivery, Testing and Orientation of Remote/Portable Production Equipment and Accessories for Public Affairs Division of PTNI

BACKGROUND:

The Public Affairs Division produces a variety of special features, programs, and coverage throughout the year. Productions are separated into teams and often shoot on location at the same time to maximize turn around. Doing so, these out-of-town and/or location shoots need several equipment – cameras, lapels, tripods, et al - at the same time. Unfortunately, most are not readily available; oftentimes, cameras or lapel microphones are in use with another team or department thus resulting in our staff renting or using their personal devices, adding to production costs.

In line with this, the Division urgently needs and requests our own equipment that our teams can use aside from the ones that can be availed through the People’s Television Network’s JO system, should one be readily available for the use of our staff. Having equipment for our own use will not only be efficient for our out-of-town teams, it will also help us lessen our production costs.

Appropriate and compatible accessories for the requested equipment are also required and included in the terms.

A. PURPOSE/OBJECTIVES:

- **DSLR CAMERA (inclusive of accessories) / MIRRORLESS INTERCHANGEABLE LENS CAMERA:** To take high quality videos and pictures for use in several Public Affairs productions and to avoid quality loss when editing. Accessories such as wide-angle lenses benefit the output quality of the equipment.
- **DRONE and QUADCOPTER:** To be able to take birds’ eyeview and exterior overhead videos that a regular hand-held camera cannot reach.
(From droneblog.com: The term drone is a catch-all term to any kind of unmanned vehicle that doesn’t have a pilot or a driver. It can be any vehicle that moves on land, water, and air. The quadcopter is a more defined word that refers to a drone using four rotors.)
- **WIDE ANGLE LENS:** To be able to take close-up (zoomed-in) videos and avoid quality loss of still pictures and videos.
- **UNDERWATER CAMERA - HOUSING –** To help protect the camera when taking underwater photos and videos

- LAPEL MICROPHONES: To be able to isolate unwanted background noises during exterior shoots and be able to have clear sounds during interviews.
- TRIPOD: To be able to hold cameras steady during outdoor/exterior location shoots
- GIMBAL: To be able to balance cameras and shoot from any angle due to the rotating head of the equipment.

These manuals should include installation instructions including figures and/or drawings, set-up procedures, and provide software needed for future reference. Manuals should be provided in both soft and hard copies so teams going on out-of-town or location shoots should be able to read it in their mobile phones or tablets without any issues.

C. PAYMENT TERMS

The payment to the winning bidder shall be processed after the issuance of the Certificate of Completion and Final Acceptance. There shall be no partial payments and/or progress billings. All requirements for such payment shall be coordinated by the winning bidder to the Property Section.
