 - 21% Cement
 - 10% Water
 - 64% Standard Sand
 - 5% - 7% Primer

2. Multi-co Polymerized Resin + Nano Silica Waterproofing Reinforced at least 2mm thick.

i. Description:

Cold applied water proofing material. Manufactured with multi-copolymerized resin + nano silica, strong cementing power resins, alkaline resistance and non-toxic/non-flammable for a durable, heat resistant, flexible and easily maintainable material.

EXECUTION

i. EXAMINATION & PREPARATION

Before installation, application and repair, verify that actual site conditions are acceptable for the application/ installation of the waterproofing materials and for repair/installation of downspouts all in accordance with manufacturer's installation instructions and technical bulletins.

INSTALLATION/APPLICATION

1. Apply waterproofing and repair/install downspouts as indicated and in accordance with the respective manufacturer's application/ installation instructions and recommendations.
2. Apply the primer as specified in the product instructions for the waterproofing.
3. For top coat cold applied waterproofing, follow manufacturer's guidelines on application of the material. Apply to a minimum of at least 2 mm thick (approximately 2 to 3 heavy coat) top coating film to achieved desired water resistance. Let each layer dry first before applying succeeding coat.
4. Full cure for at least 48 hours before water testing.

TESTING

All completed waterproofed and downspouts repaired/ installed area after application/installation and thoroughly dried/cured shall be subjected to leak testing. This is to test the effectiveness and workmanship of the completed waterproofed and repaired/installed downspouts areas for possible leaks. All defects that will be found shall be repaired immediately.

During leak testing, all equipment should be protected in case of leak occurrence. Any damage/loss during the leak testing will be of the contractor's responsibility.

PROTECTION

1. Protect areas with newly applied/installed waterproofing and downspouts repaired/ installed from damage during implementation.
2. Eliminate construction traffic on newly applied and tested waterproofing material and downspouts repaired/ installed. Do not store construction materials on waterproofed surfaces.
3. Observe all fire prevention policies and practices.
4. The days of correction or repair to all damaged waterproofing applied/installed and downspouts repaired/installed after the completion of the project but within the warranty should be within three (3) calendar days upon report.

NOTE: The above-mentioned eligibility requirements are in addition to the eligibility requirements under R.A. 9184.
